* Data suppressed in the "Race/Ethnicity" table when the count is less than five.

¹ Unlike undergraduate applicants, graduate counts only include applicants who applied in the fall. Each student is only counted once, regardless of how many applications were completed. Only new applicants are counted; readmitted applicants are excluded. New enrollment counts in the "New Enrolled Students" table may be higher than admitted counts in the "New Applicants" table if some students were admitted in an earlier term, but did not enroll until a later term.

¹ If a faculty member has multiple faculty positions across departments or colleges, each faculty member is only counted once at the university level profile and FTE is summed together. Since faculty overload positions are included, a faculty member's FTE may sum to greater than 1. If the FTE sums to .99 or greater, then the faculty member is reported as full-time even if both faculty positions were considered part-time. Faculty counts only include departmental faculty.
